

# LOVERE BILBAO I S.L

Loveire was founded in 1992, with the aim of distributing special steel for the power production market. In 2006 it moved to its current location, where it has a 2600m<sup>2</sup> warehouse available for massive storage, and 300m<sup>2</sup> for offices. During the last few years it has specialized in high temperature and special steels for valves, pumps, fluid equipment (heat exchangers, boilers..) for the manufacturing industry.

Rolled and forged materials are available under European and American standards.

We hold ISO 9001:2008 certification.

We have available in stock materials A 105N, A 350LF2, A182F11cl.2, A182F22cl.3, A 276 T410, A182F6acl.2, A 416, A 420, A182F91, A182F347, A 182 F316L, A 182 F304L, A 182 F304H, A 182 F321 and Special Stainless steels Duplex, Superduplex and Ferralium.

The range of sizes goes from diameters of 80mm to 1200mm and forged Blocks up to 25 tns weight. All our material is made in EEC.

Our Band saws capacities are:

DANOBAT CR260AF CN:  
Up to Ø 270 mm and automatic cycles.  
DANOBAT CP520AF CN:  
Up to Ø 520 mm and automatic cycles

H-7065 EVERISING HANC:  
Up to Ø 670 mm and automatic cycles.  
GANTRY 2MF FRIGGI 1500X2000X6000  
Up to Ø 1800 mm abd 1800x2200 mm

plate cutting angles 30", 45 " and 60".  
Automatic cycles.

GH bridge cranes 10,20 (2) and 32 Tonnes

And a New machine THE MATCH 3 WATERJET is capable of cutting a wide variety of materials using a very high-pressure jet of water (350mm thickness capacity).
